

Name: _____

Presentation on Your Assigned Special Effect

Include the following in your discussion

- How you purposely used and applied your special effect to your original footage
- Instances in which one could use this special effect for video or motion graphics with examples
- Aside from the keyframes and parameters are there any necessary adjustments to the special effect, for instance, when using shatter, you need to change “Wireframe” to “Rendered” so that you can see the final result of the effect
- Are there any aspects of the special effect which makes it challenging to preview or render?
- Provide instruction in terms of how to start using your effect
- using the table as a guideline, what the most important parameters and why

Parameter	What it does	Why it is important Why it is the second most important third most important, etc

Exploring Special Effects Presentation lastname_exploring effects	Level One	Level Two	Level Three	Level Four
