

Keyframing and Movement in 2D Space

- 1) What is the preset for the composition of high definition video?
width?
height?
frame rate?
- 2) What do you type to get one minute of video?
- 3) What is the checkerboard background also known as?
- 4) What are two ways of making a physical change?
- 5) What do you press to constrain the parameters (proportions) when resizing an image?
- 6) What is opacity?
- 7) What does the anchor point do?
- 8) What is keyframing?
- 9) What does keyframing control?
- 10) What do you click on to start a keyframe?
- 11) How do you navigate to the next and previous keyframe?
- 12) What is the second way of adding a keyframe?
- 13) What do you use to shape the path of movement?
- 14) How can you move more than one keyframe down the timeline?
- 15) What does the ALT button do?
- 16) What is the keyboard shortcut for.....

Position?
Scale?
Rotation?
Anchor Point?
Opacity?
- 17) Outline the steps of adding a second parameter to an existing parameter? (2 steps)
