

## Skill Building TGV: Soundscape, No Video

lastname\_soundscape

Using a multitrack audio editing program like Adobe Audition or Audacity you will create a soundscape with the source files provided.

The duration of the soundscape is 60 seconds.

The scenario is a spaceship and you are walking through it from area to area. Create different ambiances as you go from one place to another.

### Submit the following

- The final exported audio file either as a .wav or .mp3
- The Audition file so that the track and control of the tracks may be seen.

### Soundscape (Thinking)

- You must have all the created media properly submitted to be properly evaluated in this area

Thinking	Level One	Level Two	Level Three	Level Four
	10 11	12 13	14 15	16 18 20
A variety of changes occur throughout the production; Overall design is cohesive and elicits various moods throughout its duration				

### Soundscape (Application)

- You must have all the created media properly submitted to be properly evaluated in this area

Application	Level One	Level Two	Level Three	Level Four
	10 11	12 13	14 15	16 18 20
Audio levels are correctly adjusted for each sound; Overall mix is well balanced; Use of layers has depth
